

FOR MEDIUM AND HEAVY DUTY APPLICATIONS

Premium CLUTCH PILOT BALL BEARINGS

UNIREX NS GREASE

- Protection against corrosion
- Temperature range -22 F to 350 F
- Exceptional water tolerance

High Temp FULL CONTACT SEALS

- Optimum protection from dust and debris
- LLUA - **Polyacrylic** - Temperature range 0 F to 325 F
- LLUA1 - **Viton** - Temperature range -20 F to 425 F

NTN manufactures premium pilot bearings to adapt to the changing needs of the heavy duty industry. Over the past several years, the operating temperature that the pilot bearing sees has increased. Standard pilot bearings and grease cannot withstand these operating conditions. NTN recommends the use of high temperature grease and seals to ensure the longest bearing life possible.
