PRODUCT NOMENCLATURE

Stainless Steel Series	Bearing Insert	Housing Style	Insert Size**	Bore Diameter
	SUC	FL	205	- 16
Thermoplastic Series	Housing Style	Insert Size***	Bore Diameter	
	GNP	40	-	24

**For metric stainless steel series, bore diameter follows industry numbering format (e.g. 204 = 20mm bore diameter)

***For metric thermoplastic series, insert size indicates the bore diameter in millimeters.

CORROSION RESISTANT MOUNTED UNITS

- Stainless steel inserts offer superior resistance to corrosion over coated inserts
- Solid, flat base construction prevent buildup of particles in difficult to clean areas
- Self-aligning design provides optimal performance under high rotational speeds

COMPOSITION Housing: Thermoplastic Series - White PBT | Stainless Series - 304 Stainless Steel
