

SPHERICAL ROLLER BEARINGS FOR CONTINUOUS CASTING MACHINES

SNR Premier spherical roller bearings are produced in Italy to steel industry standard specifications in a wide range of sizes. SNR Premier spherical roller bearings offer the highest load rating in the industry, making them the ideal solution for the harsh operating conditions of the steel industry.

Continuous Casting Machines

Continuous casting machines subject bearings to some of the most extreme conditions possible. Bearings face high temperatures, high loads, low speeds, and water splash. SNR Premier spherical roller bearings design and quality promotes the longest calculated life in the industry, lowering the need for replacement and associated costs.

Wide Range Of Sizes Available

NTN stocks a wide range of NTN and SNR spherical roller bearing sizes for use in all areas of steel production. Please contact your local NTN representative for pricing and availability.

Features & Benefits

- Highest Load Rating in the Industry
- Industry Standard Design
- Dimensional Stability Up to 200° C
- Increased Operating Speed and Reduced Friction Torque (+30%)
- High Misalignment Capacity

PRODUCT SPEC SHEET

SPHERICAL ROLLER BEARINGS FOR STEEL PRODUCTION

In addition to continuous casting machines, SNR Premier spherical roller bearings are ideal for use in a wide variety of steel production applications. NTN's wide range of sizes available in stock ensures we can fit your needs in these applications:

- **CONTINUOUS PROCESS LINE ROLLS**
- **BEAM AND BAR MILL WORK ROLLS**
- **ROLL-OUT TABLES**
- **GEARBOXES**
- **OVERHEAD CRANES**
- **SEVERAL OTHER APPLICATIONS**
